QGIS Application - Feature request #11757
Attribute forms should have an "Apply" button

Description

Hello,

I think it could be valuable to add an apply button on the QDialogButtonBox for the form validation.
For the moment, there is only Ok and Cancel.

When the Apply button would be clicked, data should be committed (at least in an editing buffer) and the form will stay opened.
Data shown in attribute table opened after the apply click should shown the committed data.
