

QGIS Application - Bug report #11762

Modeller: wrong input files and forgets paths

2014-11-29 11:26 AM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Victor Olaya	
Category:	Processing/Modeller	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 14.04 LTS	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 19994
Description		
I found a bad bug in the modeller in master (and 2.6 I suppose) that is certainly a regression: when there are many "file" parameters, then when using them inside modules the same "file" parameter is used regardless of what the user can choose (and save). See attached screencast. I also noticed that a "string" parameter (with a file path) cannot be used in replacement of the "file" parameter, that is unfortunate as it have would worked as workaround for the above issue. In modules where a file is expected as input (and in r.reclass) it would be very handy if in the modeller the user could have the chance to open a dialog and choose the file as it is possible when the same module is used outside de modeller.		

History

#1 - 2014-11-29 11:27 AM - Giovanni Manghi

- File reclass_bug.mp4 added

#2 - 2014-11-29 11:27 AM - Giovanni Manghi

- Priority changed from Normal to Severe/Regression

#3 - 2014-11-29 11:32 AM - Giovanni Manghi

moreover input space where a file is expected seems it can be manually filled with a path, but after closing and reopening a the module the path is gone.

#4 - 2014-12-22 11:24 PM - Victor Olaya

- Status changed from Open to Feedback

should be fixed now. Can you check?

#5 - 2014-12-23 06:43 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed
