

QGIS Application - Bug report #11765

Untranslatable strings from ./src/core/qgscolorscheme.h

2014-12-01 12:02 AM - zirneklitis -

Status: Closed	
Priority: Normal	
Assignee: QGIS Translation Team	
Category: Translations and international	
Affected QGIS version: master	Regression?: No
Operating System: any	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 19997

Description

The translation for the strings included in the file ./src/core/qgscolorscheme.h does not work. There are three translatable strings:

```
..
virtual QString schemeName() const { return QT_TR_NOOP( "Recent colors" ); }
..
virtual QString schemeName() const { return QT_TR_NOOP( "Standard colors" ); }
virtual QString schemeName() const { return QT_TR_NOOP( "Project colors" ); }
..
```

They are recognized and extracted in *.ts file with "update-qt4". But the translation does not work, e.g., no luck with:

```
<context>
  <name>QgsRecentColorScheme</name>
  <message>
    <location filename="qgis/src/core/qgscolorscheme.h" line="-50"/>
    <source>Recent colors</source>
    <translation type="unfinished">Nesen lietotās krāsas</translation>
  </message>
</context>
(see the attached screen shot)
```
