## QGIS Application - Bug report #11807 Make "timestamp" datatype available for PostGIS vectors

2014-12-08 05:00 AM - Giovanni Manghi

Status:	Closed			
Priority:	Normal			
Assignee:	Jürgen Fischer			
Category:	Data Provider/PostGIS			
Affected QGIS version:master		<b>Regression?:</b>	No	
Operating System:		Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:	fixed/implemented	
Crashes QGIS or corru <b>pits</b> data:		Copied to github as #: 20031		
Description				

If you use the "date/time" edit widget to try save date **and** time in a "date" postgis column, then the time is discarded because the "date" datatype is only for dates.

http://www.postgresql.org/docs/9.3/static/datatype-datetime.html

if you want to save also the time the column must be of type "timestamp", but this type is not available in the "field" tab of the vector properties (nor is in the field calculator, but is available in DB Manager).

## History

## #1 - 2016-01-26 04:38 PM - Nyall Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed
