Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 20045
Description		
Converting offline permanently removes edit types (field ui widgets) from layer.		
Steps to reproduce:		
Add postgis layer.		
Apply edit type with Value map to field in layer properties.		
Convert layer offline.		
[edit type is missing from layer]		
Synchronize from offline state.		
[edit type is still missing from layer]		
This is preventing users from upgrading as the functionality worked in previous versions (2.0 or 2.2).		

Associated revisions

Revision 4938fe79 - 2015-02-10 06:40 PM - Jürgen Fischer

offline editing: add layer to map layer registry before
copying the symbology - otherwise edit widget settings
won't be copied (fixes #11827)
