QGIS Application - Bug report #1184
Cannot reset field settings to <off> in layers properties

2008-07-25 06:27 AM - Marco Pasetti -

Status:	Closed			
Priority:	Low			
Assignee:	Tim Sutton			
Category:	GUI			
Affected QGIS version:			**Regression?:**	No
Operating System:	All		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	11244

Description

In the layer property window I set Rotation and Area scale fields and then press OK.
After that, when I open the property window again, and I try to set one of them to <off> again, I cannot do it, because I can only select one of the fields of the related vector layer database.

Sample imagine attacched

Marco

The file size limit is too small, so I uploaded the image here: http://www.webalice.it/marco.pasetti/temp/qgis-bugs/bug001.png

#2 - 2008-07-25 08:07 AM - Maciej Sieczka -

Confirmed on Debian. Sample attached.

1. Take the attached shapefile.

2. In layer properties, set scale or rotation to some field, press OK.

3. Re-enter layer properties - you can't disable what you set in step 2.
