QGIS Application - Bug report #11840 Point displacement and selection

2014-12-11 01:27 AM - Davide Continanza

Status: Closed Priority: Normal

Assignee:

Category: Map Canvas

Affected QGIS version: 2.6.0

Operating System:

Pull Request or Patch shapplied:

Crashes QGIS or corrupts data:

Regression:

No

Resolution:

duplicate

Copied to github as #: 20057

Description

I use Point displacement style since I have some points sharing the same coordinates.

When opening the Attribute table and using "Select feature using an expression", if one item in the circle matches the expression, then all the items in its circle appear as selected (highlighted in yellow) even though they don't fit the filter.
