

QGIS Application - Bug report #11841

settings atlas feature leads to NaNs for scale and coordinates

2014-12-11 02:16 AM - Denis Rouzaud

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20058
Description		
<p>Using the action "set atlas feature for...", correctly opens the composer and sets the correct feature but the map is not adjusted properly. I get NaN for the 4 coordinates and the scale line edits.</p> <p>It is a quite recent error.</p>

Revision 7f8006f9 - 2014-12-11 02:24 PM - Denis Rouzaud

[Fix #11841] Revert "Fix calculation of atlas map extent when set to fixed scale mode"

This reverts commit b106f8225324237175aac741ede9eb5d3268edcd and fixes the setting of the atlas feature in composer.

According to Nyall original commit b106f8225324237175aac741ede9eb5d3268edcd was introduced to fix a test.

He will look to fix the test, but in the mean time we rather need working features rather than passing tests.

One might wants to disable the test?
