QGIS Application - Bug report #11850
Can't classify based on joined column

2014-12-11 03:48 PM - Christopher Young

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Symbology			
Affected QGIS version:	2.6.0	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:		**Copied to github as #:**	20065	

Description

Cannot seem to classify based on joined column. If classify instead using concat("<column name>") works just fine.

Steps to reproduce:

1. Join a layer to another.

2. Attempt to classify based on one of the joined columns. (Properties > Style)

Expected result: Distinct values for column shown

Actual result: no values show

History

#1 - 2014-12-14 03:45 AM - Giovanni Manghi

- Priority changed from High to Normal

- Status changed from Open to Feedback

- Category set to Symbology

It works fine here, please attach sample data, it may depend on what formats you are using.

#2 - 2015-05-10 05:18 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

closing for lack of feedback.
