

QGIS Application - Feature request #11854

Symbol size definition : width and height

2014-12-12 02:19 AM - Herve Christol

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 20069
Description	
<p>I would like to set the size of symbol with height en width properties (see capture). We can do that only with Ellipse Marker, why not with SVG marker ?</p> <p>I import CAD data and a lot of symbols use height and width. It's very painful to display them with only an area size property.</p> <p>Has anyone ever required such a feature ?</p>	

History

#1 - 2014-12-14 03:26 AM - Giovanni Manghi

- Target version changed from Version 2.8 to Future Release - Nice to have

#2 - 2015-01-16 05:36 AM - Claudio Martin

Consider the automatic ratio proportion and include selection of MM or Map Units, please.

#3 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No

#4 - 2019-01-22 04:46 AM - Nyal Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- Description updated

Not an issue in 3.x
