QGIS Application - Bug report #11886
DBManager always shows password to PostGIS connection in clear text in .qgs file

2014-12-18 06:17 AM - Harrissou Santanna

Status:	Closed			
Priority:	High			
Assignee:				
Category:	DB Manager			
Affected QGIS version:	2.6.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20100	

Description

Hi,

Click on "Add PostGIS table" button

Then create a new connection without saving username nor password. OK.

Connect and add some tables.

Save the project.

Launch DBManager, connect to the previous connection and add again some tables.

Save again the project.

In a text editor, you'll find that the tables added through "Add PostGIS table" don't show the username nor the password while they appear in clear text for those added through DBManager. This shouldn't be.

Seen on QGIS 2.4 (MacOS) and 2.6.1 (Win 8)
