

QGIS Application - Bug report #1189

Tickets 1180 1188 look to be a PPC issue

2008-07-27 12:24 PM - rpeskin -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: OS X	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 11249
Description	
<p>The new layer creation problem I reported in Tickets 1180 and 1188 appear to be a PPC (Power PC processor) problem. Both QGIS 0.10.1 and 0.11.0 behave correctly (with respect to new layer creation) when running on an Intel processor Mac under OS X 10.5.4. The fact that the crash is the result of a kernel fault also implies a PPC issue.</p>
