QGIS Application - Bug report #11908
Polygon shapefile not displaying at small scales

2014-12-22 12:12 PM - Matt Dallaire

Status:	Closed		
Priority:	High		
Assignee:			
Category:			
Affected QGIS version:	2.6.1	**Regression?:**	No
Operating System:	Windows 7	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20118

Description

When zooming into a shape file polygon, certain polygons disappear as you zoom in. The polygons that disappear also are not identifiable with the Identify Features tool at any scale.

History

#1 - 2014-12-23 06:49 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

you have corrupted spatial indexes. Delete the sbn/qix files, and then eventually regenerate the index (in vector properties > general), and you are good to go.
