# QGIS Application - Bug report #11908 Polygon shapefile not displaying at small scales

2014-12-22 12:12 PM - Matt Dallaire

Status: Closed
Priority: High

Assignee: Category:

Affected QGIS version:2.6.1

Operating System: Windows 7

Pull Request or Patch shapplied:

Crashes QGIS or corruphs data:

Regression?: No

Resolution: invalid

Copied to github as #: 20118

## **Description**

When zooming into a shape file polygon, certain polygons disappear as you zoom in. The polygons that disappear also are not identifiable with the Identify Features tool at any scale.

## History

## #1 - 2014-12-23 06:49 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

you have corrupted spatial indexes. Delete the sbn/qix files, and then eventually regenerate the index (in vector properties > general), and you are good to go.
