

QGIS Application - Bug report #11921

Legend initially displayed wrong size

2014-12-29 05:17 AM - Harry Clarke

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 2.6.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 20130
Description	
<p>When opening Print Composer with a map that has the Legend with item units specified in Map Units, the Legend is incorrectly displayed very large.</p> <p>A workaround is to perform the following operations</p> <p>Refresh - this results in the Legend been displayed the correct size. However, the map is very small</p> <p>Zoom to Full Size - this resizes the map to readable size, but a very low resolution</p> <p>Refresh - this results in the map been displayed correctly.</p> <p>To reproduce, Open a new Project in QGIS Browser, and then Open Print Composer.</p> <p>If Print Composer is closed and then re-opened without changing the Project, the map is displayed correctly.</p>
