- *Assignee deleted (BRUNO BELLAZZI)*

is this a different feature request than #11922 ?

if yes, why the title is the same? Please leave feedback.

#2 - 2014-12-29 09:29 AM - BRUNO BELLAZZI

Sorry im new in this ...the title should be OUTPUT IN 3D PDF from map composer.

Thanks

Thanks

what is a 3d pdf? is there any specifications page? is part of the geospatial pdf format (the geopdf format is different and is proprietary)?

- *File Utah-12TVL360040-PtTerrainSurfaceTin.pdf added*

See this example . On adobe pro page , is a special PDF output for 3d info -

the format is U3D third edition or PRC . But on the web there is a lot of refernces about.
For example a commercial Gis low cost as Global Mapper has thkis capability (with geopdf and layered level)
Thanks.
