#### History

Did you verify those "unselectable" polygons to be selectable while rotation is not active ?

Nevermind, I tried myself and confirm it works with rotation non-active. While the "Coordinate" widget shows the *same* coordinate, non-rotated canvas succeeds at selecting a feature while rotated canvas fails.

Giovanni, can you confirm the problem only appears when rotation is exactly 45 degrees ? Things work for me just fine with rotation of 46 or 44 degrees...

Also, it's only with select by point. If you select by rectangle it works.

##### #5 - 2015-01-03 08:18 AM - Sandro Santilli

Probably related to #11865
