

QGIS Application - Feature request #11933

Add Vector Join - possibility to select multiple fields to include at once

2015-01-04 01:52 AM - baditaflorin -

Status:	Open	Resolution: Copied to github as #: 20141
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
If you have a table with over 100 fields, it can become pretty tedious to select just the ones that you need. It would be nice , as a first implementation, the ability to select via CTRL or Shift more fields, and in the future to have the possibility to remember the last choice
