

QGIS Application - Feature request #11945

Map Legend > Composer to take the name of the column in the style, not of the file

2015-01-04 12:22 PM - baditaflorin -

Status: Closed	
Priority: Low	
Assignee:	
Category: Map Legend	
Pull Request or Patch Supplied:	Resolution: invalid
Easy fix?: No	Copied to github as #: 20153
Description	
<p>Now, Map Composer Legend Show the name of the File. I am working with the same file, that have over 100 columns, and i want to print a map of each of the different values, represented via Style > Category</p> <p>Each time i do this, i have to manually change the name in the legend to correspond to the column, not the file. cut this be possible, via Expressions or something ?</p>
