

QGIS Application - Feature request #11958

labelling equidistant points in feature style

2015-01-06 08:17 AM - Rodrigo Principe

Status: Open	
Priority: Normal	
Assignee:	
Category: Labelling	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 20166
Description	
<p>I found the way to put points in a line at equidistant (in map units), and I think it is great!. But why not go feather? It would be helpful to label those points with the actual distance. I hope you understand me. I upload an simple example. Thanks!</p>
