| Description | |
| <p>Based off 2.6.1 behaviour, some suggestions for the CRS list.</p> <p>The filter is great, but if you don't know which projection you want and wish to explore, using the list is currently a pain. These should help with that scenario.</p> <ul style="list-style-type: none">- Remember which groups of projections are open/closed (the +/- icon) between openings of the CRS dialog.- A checkbox (off by default) for "Show IAU projections!". I doubt I'm exaggerating when I say that over 99.99% of users are never going to need any of these these.- "Hide deprecated CRS's" checked by default.- Remember the tick state of "Hide Deprecated CRS's" check box between openings of the window. | |
