

QGIS Application - Bug report #12000

Vector columns "comment" option is inconsisent

2015-01-18 12:54 PM - Giovanni Manghi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 20204
Description		
<p>When adding new columns in vector layers, the option to add a column "comment" is inconsistent.</p> <ul style="list-style-type: none">- it is available in some place for shapefiles (for example "vector properties > fields > add column" or "table of attributes > add column"), but not others ("layer > create layer > new shapefile") and anyway for such data formats it should not show at all, in fact if you try to add one comment it is immediately discarded.- on the other hand for formats where it makes sense (ex: PostgreSQL), does not show anywhere like it should, like DB Manager and the Field Calculator.
