

QGIS Application - Bug report #1202

Classify Equal Interval does't work with some Mid/Mif

2008-08-04 03:36 PM - fabceolin -

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Vectors	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11262
Description		
<p>Under certain cases, the Classify button doesn't show a correct classification. Clicking on Properties / Graduated Symbol / Classification Field "Densidade" / Mode "Equal Interval" / Number Of Classes 3 / Classify, the values appears between -0.001 and 0.001, and, the correct was 0 and 8.7. See attached mid/mif and screenshot</p>		

History

#1 - 2009-06-29 09:28 AM - Giovanni Manghi

Tested on QGIS 1.2 (rev. 10988), with the same sample data and the same properties now thw shown classes are

-0.001 - 2.936

2.936 - 5.871

5.871 - 8.808

solved? closing?

#2 - 2009-07-03 04:15 AM - Giovanni Manghi

After the changes that fixed

<https://trac.osgeo.org/qgis/ticket/983>

should we close also this one?

Now the classes are (relative to the proposed data/example)

0 - 2.935744

2.935744 - 5.871489

5.871489 - 8.807233

and the attribute table reads (for that specifi column):

0

1.77759541634916

8.02046580084215
8.02046580084215
8.02046580084215

#3 - 2009-07-08 03:08 PM - Giovanni Manghi
- *Resolution set to fixed*
- *Status changed from Open to Closed*

Closing this ticket, reopen it if necessary.
