

QGIS Application - Bug report #12036

Map jumps in print composer when zooming in

2015-01-22 01:34 AM - Oskar Karlin

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.6.1	Regression?: No
Operating System:	Mac OS X	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 20239
Description		
When in the print composer and I zoom in to a certain point the map view jumps a lot one direction (not sure where). It's pretty annoying.

- Status changed from Open to Feedback
- Category set to Map Composer/Printing

Does this happens always, regardless of the project/data? can you attach a project, with the data and the proper layout, to allow us do local tests?

#2 - 2015-01-22 10:22 AM - Oskar Karlin

This happens always, regardless of the project. When I zoom in to a certain level it moves!

Also, the map is pretty pixelated when i zoom in. Not after export though (because of vector pdf/svg).

#3 - 2015-03-25 05:05 PM - Nyal Dawson

- Resolution set to fixed/implemented
- Status changed from Feedback to Closed

Fixed in 2.8
