<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 20240
<b>Description</b>	
<p>There doesn't appear to be a way to transfer files from QGIS to PostGIS in DBManager, either through a DBManager menu item or through drag and drop from the filesystem, QGIS Browser or QGIS layer manager. Note that this issue is not the same as #4777, which describes importing FROM QGIS to PostGIS. That part is already implemented. What this issues is asking for is the other way around... from QGIS to PostGIS.</p>
