Crashes QGIS or corrupts data:		**Copied to github as #:**	20252	

Description

I'm seeing an occasional crash on launch with current master. I've been unable to reliably reproduce it, but the console will output

src/gui/qgsmapcanvas.cpp: 846: (setExtent) [0ms] Empty extent - keeping old scale with new center!

hundreds of times before the crash occurs. I suspect this is probably related to the rotation refactoring changes to map canvas.

Revision ffd7f8a8 - 2015-02-17 12:19 PM - Martin Dobias

Fix #12050 - possible crash on launch

Do not allow infinite recursion setExtent() -> setCenter() -> setExtent()

History

Couldn't reproduce a crash on start, but this Python code will lead to the same crash:

```
from qgis.gui import QgsMapCanvas
c=QgsMapCanvas()
c.resize(0,0)
c.setExtent(QgsRectangle(1,1,1,1))
```
