

QGIS Application - Bug report #12115
GRASS in the Processing - Missing dependency

2015-02-02 01:18 PM - Pedro Venâncio

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Victor Olaya	
Category:	Processing/GRASS	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 20309
Description		
<p>I updated Master on Linux to 2.7.0+git20150202+6e94688~precise-ubuntugis1 and when I try to run any GRASS Processing modules I get:</p> <p>Missing dependency. This algorithm cannot be run :-(</p> <p>This algorithm requires GRASS to be run. Unfortunately, it seems that GRASS is not installed in your system, or it is not correctly configured to be used from QGIS</p> <p>Click here to know more about how to install and configure GRASS to be used with QGIS</p> <p>I also have lost the icons on the Processing menu.</p> <p>With 2.6 and 2.4 (on the same machine) everything is ok.</p> <p>This is recent, because it worked in the master versions of last week.</p>		

History

#1 - 2015-02-03 01:51 AM - Pedro Venâncio

This problem also affects Master in Windows (OSGeo4W).

#2 - 2015-02-12 04:26 PM - Jürgen Fischer

Is this still the case?

#3 - 2015-02-12 04:26 PM - Jürgen Fischer

- Status changed from Open to Feedback

#4 - 2015-02-12 11:54 PM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed
