

QGIS Application - Bug report #12120

QGIS Server: WMS - rules?

2015-02-03 08:31 AM - Jeffrey Bostoan

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Affected QGIS version: 2.6.0	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 20314

Description

For some reason - maybe it is by design? - the WMS seems to ignore the rules I've set for a particular shapefile ("lyr_mob_strooiplan"). When setting up the service in QGIS Desktop, it renders perfectly. But the legend (PNG) only shows the 2 categories but in black?

Maybe I'm missing something?
.QGS-file attached.

the project file without the data does not help.

#2 - 2015-02-03 11:53 PM - Jeffrey Bostoan

- File Sneeuw.zip added

Here's the shapefile. (lyr_mob_strooiplan).

When viewing the WMS, I only see darker polylines, without colors. Same thing if I alter it to a single symbol.

I might be overlooking something, perhaps I need to define the style in a different way?

I've also been googling on some proper documentation about how the STYLE parameter works for the MapServer's WMS, but haven't found anything useful yet?

#3 - 2015-02-04 01:42 AM - Giovanni Manghi

- File wms.png added

attached an image as your layer/project looks like when loaded as WMS layer using QGIS server. Seems ok to me.

My bad. I just did a clean re-install of the QGIS-server package and it works perfectly.

#5 - 2015-02-04 03:19 AM - Giovanni Manghi

- Resolution set to invalid
