

QGIS Application - Bug report #1215

"blue pencil" Attribute Edit

2008-08-08 04:48 AM - Serge Dikiy

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11275
Description		
Can not edit object attributes -- when clicking on object in edit mode, info popup appears. Should appear "Enter attribute values", but "Identify results" pops up.

History

#1 - 2008-08-11 02:28 PM - Serge Dikiy

Please, modify `[[QgsMapToolIdentify]]::identifyVectorLayer` in `/trunk/qgis/src/app/qgsmaptoolidentify.cpp` (add line from 417,516 to 589 in really used function). If it@s possible.

#2 - 2008-08-12 03:35 AM - Serge Dikiy

Hi, Marco

What reason for remove ability 'Attribute Edit' in `[[QgsMapToolIdentify]]::identifyVectorLayer` commit:2002f683 (SVN r7885)?

[\[https://trac.osgeo.org/qgis/browser/trunk/qgis/src/app/qgsmaptoolidentify.cpp?rev=7884\]](https://trac.osgeo.org/qgis/browser/trunk/qgis/src/app/qgsmaptoolidentify.cpp?rev=7884)

Thank you.

#3 - 2008-08-12 05:24 AM - Marco Hugentobler

Hi sdikiy

The reason is that `[[QgsVectorLayer]]` is not able to cope with geometry edits and attribute edits (uncommitted changes) at the same time. It is a deficiency and hopefully it can be solved in the future. Because of this deficiency, the attribute table is modal for attribute edits such that user has to close it before doing further map editing. In the same sense, I commented out the code in `[[QgsMapToolIdentify]]` that would allow users to change values in edit mode.

Marco

What a coincidence. I just ran into that problem and working it...

See <http://lists.osgeo.org/pipermail/qgis-developer/2008-August/004602.html>

#5 - 2008-08-20 08:20 AM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:43278d72 (SVN r9093)

#6 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted

#7 - 2010-03-05 05:51 AM - Serge Dikiy

- Status changed from Closed to Feedback
- Resolution deleted (fixed)

"Can not edit object attributes -- when clicking on object..." :-(

#8 - 2010-03-05 07:13 AM - Jürgen Fischer

- Status changed from Feedback to Closed
- Resolution set to fixed

Huh? You can set the configure the identify tool to open the feature form when you identify a single feature - which is in editing mode, if the layer is. If you hit multiple features, you need to open a feature form for each feature from the action form.
