

QGIS Application - Feature request #12175

Using 'multi layered' TTF symbols

2015-02-10 12:52 PM - Rohrer Daniel

Status: Open	
Priority: Normal	
Assignee:	
Category: Symbology	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 20366
Description	
<p>Hello,</p> <p>I try to work with the TTF font Cadastra downloadable from</p> <p>http://www.cadastr.ch/internet/cadastr/fr/home/products/cadastra_map.html</p> <p>This CadastraSymbol_TTF.zip Police consists of 2 "layers" 1 for the symbol; 1 to the symbol of the mask.</p> <p>Installed ubuntu 14.04, using commands</p> <pre>sudo gnome-font-viewer CadastraSymbol.ttf sudo gnome-font-viewer CadastraMask.ttf</pre> <p>This font is available in 2 distinct definitions in LibreOffice, while in QGIS, it appears "that" made in its release: Layer 1 + Layer 2, all in one color (=> so unusable).</p> <p>Is it possible use those in the same way as LibreOffice (TTF layers separated)?</p> <p>Thank you for your commitment,</p> <p>Best Regards</p> <p>Daniel</p>	

History

#1 - 2015-02-10 04:05 PM - Jürgen Fischer

- Project changed from QGIS Redmine (QGIS bug tracker) to QGIS Application

#2 - 2015-02-10 04:09 PM - Jürgen Fischer

- Category set to Symbology

#3 - 2015-02-10 04:09 PM - Jürgen Fischer

- Subject changed from Utilisation de symboles TTF "multicouches" to Using 'multi layered' TTF symbols

#4 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No
