

QGIS Application - Feature request #12180

Print composer: more interactive map rotation tool

2015-02-11 01:39 AM - Andreas Neumann

Status:	Open	Resolution: Copied to github as #: 20370
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>The map rotation in the print composer should be more intuitive. Currently, one can only set the rotation numerically in the map properties.</p> <p>A new interactive rotation tool could be combined with the pan tool. When pressing a modifier key the rotation mode could be activated.</p> <p>I envisage a rotation tool similar to OpenLayers 3: http://openlayers.org/en/v3.2.0/examples/drag-rotate-and-zoom.html</p> <p>However, maybe only limited to rotating. I find the combined rotate/zoom a bit hard to use.</p> <p>-----</p> <p>This is linked to #12179 - first, the interactive rotation tool in the main map canvas should be implemented and tested. Later, after the print composer redesign work done by Nyall Dawson, this interactive map rotation tool should also be introduced in the print composer.</p>
