

QGIS Application - Feature request #12184
catch "Raise Warning" and "Raise Notice" messages from PostGIS

2015-02-11 03:47 AM - Georg Prziwiwal

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/PostGIS	
Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 20374
Description		
<p>QGIS can't catch "Raise Warning" and "Raise Notice" messages from PostGIS(while editing PostGIS-Layers) from a PostgreSQL/PostGIS-Trigger-Function within QGIS. One example: I have a trigger that reacts to insert or update-events and sends back notices to the client.In QGIS i just get messages from raise exeption but not notices or warnings. I think this is a very important functionality to be able to use QGIS in combination with postgis databases.</p>
