

QGIS Application - Bug report #12185

cannot copy postgis layers between two schemas in the same db using qgis browser

2015-02-11 09:50 AM - Manel Clos

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Browser	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 20375
Description		
<p>I'm getting a "relation already exists" error when trying to copy the table to a different schema in the same database (postgis).</p> <p>Using the database administrator plugin, I can copy it (duplicate on the database) with no problems.</p>

what tool does return that message? DB Manager? The browser?

what is the "database administrator plugin"?

#2 - 2015-02-12 03:55 AM - Manel Clos

Hi,

The message is from the Browser. With the postgis database and both schemas open, I drag one layer to a different schema until I get the "+" icon, then I drop the layer. The message appears just after, when qgis tries to execute the "copy" operation.

For "database administrator plugin" I meant the DB Manager plugin by Giuseppe Sucameli.
