Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	20385

Description

In order to create a map that covers the full extent of the page one has to to manually draw a box (during which snapping is not possible), then drag the map item into a corner (during which snapping is enabled), then resize the map to the full size (during which is also enabled). A "Resize Page to Map" and "Resize Map to Page" would be great.
