<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 20386
<b>Description</b>	
I have some old presets I can't delete in a project. When I select one, it is not ticked as current, hence I cannot delete it.

Fix #12197 - cannot delete old visibility preset

When a preset gets applied, we try to fix it by removing irrelevant stuff (e.g. legend items that do not exist anymore, styles that do not exist).

This is however slightly complicated and leaves room for problems.

Let's simply fix the presets by assigning them the current state after being applied - and get rid of all the patching...
