Affected QGIS version:	2.6.1		**Regression?:**	No
Operating System:	Debian		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	20415

Description

I had a shapefile I made available as a WFS-service with QGis Server.

OpenLayers 3 kept giving me an error. Turns out I was using a path in the shapefile, D:\\location-on-disk , that was giving us some trouble.
It seems like the JSON spec would require that it is properly escaped.

So the GeoJSON contains something like "myProperty" : "D:\\location-on-disk"   instead of "myProperty" : "D:\\\\location-on-disk".
