

# QGIS Application - Bug report #12275

## Diagrams shown only for one layer, forever

2015-02-26 03:51 AM - Kevin Darras

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Diagrams	
<b>Affected QGIS version:</b> 2.8.0	<b>Regression?:</b> No
<b>Operating System:</b> Windows Seven	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 20458
<b>Description</b>	
<p>I am not sure whether everyone has the same problem, but here it is:</p> <p>I have a nice project file in Qgis 2.6.1 with lots of layers. Sometimes I need to show diagrams from either one layer or the other.</p> <p>However it seems that the layer for which I generated diagrams first prevents the diagram generation for other layers, even after unchecking/hiding them. The only solution is to to a new project file and re-import the layers.</p> <p>You can try that with the two test files I attached here.</p>

Hi,

I cannot see this issue, or maybe I haven't understand it.

It would be better to attach a sample project, were you have configured the diagram options that in your case are causing the described issue.

- File *diagrams\_not\_showing\_for\_all\_layers.qgs* added

Thanks for your answer.

Here is the project file that you can use along with the layer files I sent.

Actually it does not seem to depend on which layer you enable diagrams for. I tried to repeat it here but this time the diagrams just don't show for the points layer, although they do for the polygon layer (and they did some other time I tried).

#### #3 - 2015-03-04 04:56 AM - Giovanni Manghi

- File *diagrams.png* added

I can see diagrams from both layers, see attached image. Isn't this what you are getting?

**#4 - 2015-03-05 10:56 AM - Kevin Darras**

No, I don't see the smaller pie charts at all. I disabled all plugins that I installed additionally to the default ones and I still have the same problem.

I'm lost, I cannot understand what diagrams do not show, can you post a screenshot describing the issue? thanks.

As I said, I don't see the smaller pie charts of the point layer (screenshot attached). Even when I check the box to show all diagrams including colliding ones.

do you acknowledge that in the image I attached here the diagrams are visible? try exclude factors like 3rd party plugins.

Can you test again with current master version? A lot of diagram related fixes have landed which may have solved this.

**#9 - 2015-04-13 05:53 PM - Kevin Darras**

- % Done changed from 0 to 100

- File *all\_diagrams\_displayed.PNG* added

- Status changed from Feedback to Closed

Problem solved, thank you very much.
