

QGIS Application - Bug report #12290

proxy settings only works one time, and then QGIS "forgets" the settings

2015-03-02 05:33 AM - Joachim Deutmann

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Network	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20469
Description		
<p>I am forced to use a proxy-server to use webservises in QGIS 2.6. At the same time i use also webservises from my internal server. For this services, the proxy is not responsible for, so i must set URL exceptions. On first start of QGIS, i set the parameters in the networkdialog (host, port, user, password, proxytyp (HttpProxy) and, very important, the URL exception (here "http://172.")). After that, QGIS works as expected. If i close QGIS and start it again, QGIS "forgets" the settings. Now it is only possible to load external webservises. The local services are not available from now on. To solve the problem, i must delete the "proxy" entry in the windows registry. Then i must set all parameters like on first start of QGIS. This is reproduceable again and again and again...</p> <p>In QGIS 1.8, it all works fine for a long time since today and in the future i think..</p>		

History

#1 - 2015-05-10 01:03 AM - Giovanni Manghi

- Target version changed from Version 2.8 to Version 2.8.2

#2 - 2015-05-10 01:40 AM - Jürgen Fischer

- Target version changed from Version 2.8.2 to Future Release - High Priority

- Status changed from Open to Feedback

not reproducible here in master.

#3 - 2015-05-22 05:17 AM - Saber Razmjooei

- Status changed from Feedback to Closed

Not reproducible in 2.8.2 and master.
