Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 20471

Description

Hi all,

I'm trying to install the GEarthView plugin but I got the error:

The plugin is broken. Python said:
No module named zope.interface

I tried to install different version of zope.interface lib and also the Twisted lib (as suggested in some posts around the web) but without success.

I'm using QGIS Brighton 2.6.1 on a WINDOWS 7 ENTERPRISE 64 bit machine
but I also tried the QGIS Wien just released

Could you please tell me if there is any work around to this problem?

thanks in advance!!

History

#1 - 2015-03-02 07:24 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

issues about the plugin must be reported to the proper bug tracker

<https://github.com/geodrinx/gearthview/issues>

cheers!
