

QGIS Application - Bug report #12301

Identify tool and highlighting behaviour

2015-03-03 12:04 AM - Mart Reinola

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Canvas	
Affected QGIS version: 2.8.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 20479
Description	
In Qgis <2.6 when you clicked on object after object with the info tool, only the last object clicked was highlighted, highlighting on the previous object was turned off (with the auto-open feature attributes form option turned on). In Qgis 2.6 and 2.8, the highlight stays on.	

History

are you sure that you don't have any feature form dialog open? this is usually the source of this "issue".

#2 - 2015-03-03 03:04 AM - Mart Reinola

I'm sure that i do have the feature dialogs open, and that when i close the dialogs, the highlighting goes off. Yet, in previous versions it didn't matter, only the last object clicked was highlighted.

sorry I'm not sure I understand: if you close the identify/form feature dialog, and the highlighting goes away, where is the issue? The behavior changed from previous qgis releases, but this is known and was by design.

Before i didnt have to close dialogs, now i do. That means extra clicks. So, in that aspect, the new version is not an improvement. But, then again, as i understand its by design and ment to work like that, so its not a bug.

#5 - 2015-05-22 04:34 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

I see your point, but is really by design.
