Description

In file [source:trunk/qgis/src/plugins/dxf2shp_converter/dxf2shpconverter.cpp?rev=9053#L114 dxf2shpconverter.cpp], lines 119-121, there are some actions implemented that seem to be garbage and never used:

```
[[QgsMapLayer]] *layer = mQGisIface->activeLayer();
if (layer)
    [[QgsVectorLayer]] *lyr = (QgsVectorLayer*)layer;
```

Or, it's a kind of logical error (cast and assignment to lyr object in local scope of if-condition) and the idea was to use the retrieved active layer but bits of usage are missing.
