

QGIS Application - Feature request #12365
Support custom text editor to modify scripts

2015-03-12 05:57 PM - Mikhail Titov

Status:	Open	Resolution: Copied to github as #: 20540
Priority:	Low	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>I would really like to see my R scripts edited in, e.g., Emacs, for this emacsclientw shall be called with the name of the script file.</p> <p>One way would be to respect EDITOR environment variable and just let Windows users know to set it up (and how) for an alternative editor to be used. On the second thought, OSGeo4W really messes up environment variables.</p> <p>Or just add an explicit option to select an editor.</p>
