Working fine here, and there's multiple regression tests in place for this feature. It's likely a local issue - can you please post more details of your setup?

Right now I am trying to Compose a Map, and Drawing Coordinates Outside Frame is not Working again, check at the print screen I attached. I am thinking to do is add them later with Photoshop.

Thank you for your response!

I am experiencing exactly the same issue.

Version KyngChaos 2.8.1-1, all modules updated, Yosemite latest version.

Best regards
