Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Easy fix?:	No		**Copied to github as #:**	20558

Description

Hello Martin,

What do you think about this idea:
-have a shortcut (for instance key:"v" while digitizing), which show all vertices (with circle or cross markers or others) from all layers in the current map extent or in the near of the digitizing mouse cursor

this idea comes from arcgis...

Duplicate of #12355

Sure there could be a shortcut for that - but let's keep the discussion in the original issue
