### Description

When exporting or importing symbols from the Style manager, symbols are sorted according to type (lines, pints etc.). The order is however wrong:

- points and fills are mixed up
- points should go before lines
- custom (user created) lines go mixed among points and fills

## History

**#1 - 2017-05-01 01:07 AM - Giovanni Manghi**

*- Easy fix? set to No*

*- Regression? set to No*

**#2 - 2018-03-07 05:38 PM - Paolo Cavallini**

*- Affected QGIS version changed from 2.8.1 to 3.0.0*

*- Priority changed from Normal to Low*

*- Description updated*

Unchanged in QGIS 3.
