QGIS Application - Feature request #12405
Disable the line edit about filepath destination in dialogs

2015-03-19 02:55 AM - Etienne Trimaille

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	20578

Description

When users are using the "save as" function or others algorithms from the raster or vector menu, they "very" often use the line edit to put the name of the file and not the full file path.
Then an error will occur, because they can't write in the root folder.

Is it possible to disable this line edit by default ?
However, I know that a lot of us use this line edit, so we may add an option in the settings to unlock these lines edits.
Or improve the UI to highlight the "browse" button.
