

QGIS Application - Bug report #12414

Cannot change Filter

2015-03-20 12:57 AM - Paul Mellon

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 20586
Description		
<p>Adding new MSSQL layer, setting a filter, all OK.</p> <p>After adding, cannot alter the filter. Also show object count gives [0].</p> <p>This used to work fine in 2.2, but 2.6 and 2.8 it no longer works.</p>		

History

#1 - 2015-03-22 03:18 AM - Giovanni Manghi

- Target version set to Version 2.10
- Priority changed from Normal to Severe/Regression

#2 - 2015-03-22 07:09 AM - Jürgen Fischer

- Target version changed from Version 2.10 to Future Release - High Priority

#3 - 2015-03-23 04:26 AM - Giovanni Manghi

- Subject changed from MS SQL Layer cannot change Filter to Cannot change Filter
- Category changed from Data Provider/MSSQL to Vectors
- Affected QGIS version changed from 2.8.1 to master
- Operating System deleted (Windows 7 64-bit, MS SQL Server 2012)

I have just hit the same problem, but with a PostGIS layer.

It happened on a project made with an old version of qgis (probably 2.2).

When trying to remove the filter I get

An error occurred when executing the query.

The data provider said:

- no result buffer
- no result buffer

#4 - 2015-06-04 09:26 AM - Alessandro Pasotti

Cannot reproduce in current master. Tested with postgis on a new project.

I think we need a test project and a step-by-step procedure to reproduce.

#5 - 2015-06-05 12:01 PM - Giovanni Manghi

- *Resolution set to fixed/implemented*
- *Status changed from Open to Closed*

it seems to work fine on qgis master, please reopen if necessary.
