Affected QGIS version:	2.8.1	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20593

Description

Hey,

Decimal on range field (form customizing) is not save with project.

There is rounding.

Example :

0,2 become 0

On *.qpj : <widgetv2config AllowNull="1" fieldEditable="0" Step="0" Style="SpinBox" labelOnTop="0" Min="0" Max="5"/>

(fieldEditable is always integer)

No alternative ?

Thanks

- Status changed from Closed to Reopened

Hi, I just tried the stable release and the problem does not seem to be fully fixed.

Now it is no longer possible to specify a decimal in the step parameter (also for double or real or similar numeric fields)...

I can only enter numbers in the "step" parameter, no points or commas...
