

QGIS Application - Bug report #12424

Custom settings: save buttons all different

2015-03-21 02:39 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20596
Description		
<p>In different dialogs, different ways of saving and loading custom settings are used:</p> <ul style="list-style-type: none">- Style manager: bottom center, button "Share"- Shortcuts: bottom left, button "Load..." and "Save..."- Customization: top left, icons for save and load- Predefined scales and Project scales: vertical bottom right, icons for load and save- Default styles: vertical bottom right, buttons "Import" and "Export". <p>There might be others.</p> <p>This is confusing to the user, and should better be made uniform (with a widget?).</p> <p>It might be a rather easy fix.</p>

Paolo - this sounds like a perfect project for the ux team. If a mockup of the best load/save widget was created and a complete list of existing implementations compiled then it would be quite straightforward for a dev to make the changes...

The list is AFAIK complete. The best implementation is IMHO the customization one (icons), but I'm not a UX expert.

I also think that the save and load icons are the better solution, e.g.

The example also show a second issue: the "Add color" and "Remove color" buttons could easily be replaced by the + and - icons. Copy and paste icons from the editing toolbar could be used as well:

... Should I create a new ticket for these other issues?
