#### Description

The `plugin_builder.py` generates README file with incorrect URL to QGIS API reference:

You really need to read the QGIS API Documentation now at:

[http://svn.qgis.org/api\\_doc/html/](http://svn.qgis.org/api_doc/html/)

In particular look at the following classes:

QGisInterface : [http://svn.qgis.org/api\\_doc/html/classQgisInterface.html](http://svn.qgis.org/api_doc/html/classQgisInterface.html)

[[QgsMapCanvas]] : [http://svn.qgis.org/api\\_doc/html/classQgsMapCanvas.html](http://svn.qgis.org/api_doc/html/classQgsMapCanvas.html)

[[QgsMapTool]] : [http://svn.qgis.org/api\\_doc/html/classQgsMapTool.html](http://svn.qgis.org/api_doc/html/classQgsMapTool.html)

[[QgsPlugin]] : [http://svn.qgis.org/api\\_doc/html/classQgsPlugin.html](http://svn.qgis.org/api_doc/html/classQgsPlugin.html)

As the QGIS website points, API reference is available at <http://doc.qgis.org/>
